DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, and 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Craig et al. (6,118,233).

Regarding claim 1, Craig discloses a dynamic voltage focus amplifier showing a source of high voltage (VSU), a pull-up transistor (Q1) responsive to a control voltage (C26,R1) and coupled to the source of high voltage (D7) and to a capacitive load (C1,c22), a source of a periodic dynamic focus input signal (V5), and a pull-down transistor (Q5) responsive to the input signal (V5) and coupled to the capacitive load (through R2, D4, Q20, Q13). The capacitor C1 or C22 is coupled to the capacitor C26, which directly influences the voltage stored in the C26.

Regarding claim 2, the storage capacitor is met by capacitor C26.

Regarding claim 3, the pull-down transistor Q5 is coupled to the C26 and capacitors C22 and C1 as shown in Figure 1B.

Regarding claim 5, capacitor C26 is connected to D7 and emitter of Q1.

Regarding claim 7, the diode D7 inherently includes impedance.

Regarding claim 8, see diode D7.

Regarding claim 9, see V5 and V13.

Regarding claims 10-11, see corresponding rejections as set forth above.

Allowable Subject Matter

3. Claims 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gent (4,473,780) shows transistors T1 and T2.

George (6,300,731) shows a dynamic focus controller.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number 571-272-7349. The examiner can normally be reached on Monday through Thursday from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Ometz, can be reached on 571-272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
